Comparison of adjusted information to U.S. GAAP information

This presentation includes adjusted financial measures that are derived from the Company's continuing operations. This non-GAAP information is provided in order to allow investors to make meaningful comparisons of the Company's operating performance between periods and to view the Company's business from the same perspective as Company management.

The Company's earnings release dated July 27, 2017 contains exhibits that reconcile the differences between the non-GAAP measures and comparable financial measures calculated in accordance with U.S. GAAP.

“Safe Harbor” statement under the Private Securities Litigation Reform Act of 1995

This presentation contains “forward-looking statements,” as defined in the Private Securities Litigation Reform Act of 1995. These statements, which express management’s current views concerning future events, trends, contingencies or results, appear at various places in this report and use words like “anticipate,” “assume,” “believe,” “continue,” “estimate,” “expect,” “forecast,” “future,” “intend,” “plan,” “potential,” “predict,” “project,” “strategy,” “target” and similar terms, and future or conditional tense verbs like “could,” “may,” “might,” “should,” “will” and “would.” For example, management may use forward-looking statements when addressing topics such as: the outcome of contingencies; future actions by regulators; changes in the Company’s business strategies and methods of generating revenue; the development and performance of the Company’s services and products; the expected impact of acquisitions and dispositions; the Company’s effective tax rates; and the Company’s cost structure, dividend policy, cash flows or liquidity.

Forward-looking statements are subject to inherent risks and uncertainties. Factors that could cause actual results to differ materially from those expressed or implied in forward-looking statements include, among other things:

- worldwide economic, financial, political and regulatory conditions, including economic conditions and regulatory changes that may result from the United Kingdom’s likely exit from the European Union;
- the rapidly evolving regulatory environment, in the United States and abroad, affecting S&P Global Ratings, S&P Global Platts, S&P Dow Jones Indices, and S&P Global Market Intelligence, including new and amended regulations and the Company’s compliance therewith;
- our ability to make acquisitions and dispositions and successfully integrate the businesses we acquire;
- the outcome of litigation, government and regulatory proceedings, investigations and inquiries, and the outcome of any review by controlling tax authorities of the Company’s tax positions;
- the health of debt and equity markets, including credit quality and spreads, the level of liquidity and future debt issuances;
- the demand and market for credit ratings in and across the sectors and geographies where the Company operates;
- concerns in the marketplace affecting the Company’s credibility or otherwise affecting market perceptions of the integrity or utility of independent credit ratings;
- the effect of competitive products and pricing, including the level of success of new product developments and global expansion and the introduction of competing products or technologies by other companies;
- consolidation in the Company’s end-customer markets;
- the impact of cost-cutting pressures across the financial services industry;
- a decline in the demand for credit risk management tools by financial institutions;
- the level of merger and acquisition activity in the United States and abroad;
- the volatility of the energy marketplace;
- the health of the commodities markets;
- the impact of cost-cutting pressures and reduced trading in oil and other commodities markets;
- our ability to incentivize and retain key employees;
- the Company’s ability to maintain adequate physical, technical and administrative safeguards to protect the security of confidential information and data, and the potential of a system or network disruption that results in regulatory penalties, remedial costs or improper disclosure of confidential information or data;
- the Company’s ability to successfully recover should it experience a disaster or other business continuity problem from a hurricane, flood, earthquake, terrorist attack, pandemic, security breach, cyber-attack, power loss, telecommunications failure or other natural or man-made event;
- changes in applicable tax or accounting requirements;
- the level of the Company’s future cash flows and capital investments;
- the impact on the Company’s revenue and net income caused by fluctuations in foreign currency exchange rates; and
- the Company’s exposure to potential criminal sanctions or civil penalties if it fails to comply with foreign and U.S. laws and regulations that are applicable in the domestic and international jurisdictions in which it operates, including sanctions laws relating to countries such as Iran, Russia, Sudan and Syria, anti-corruption laws such as the U.S. Foreign Corrupt Practices Act and the U.K. Bribery Act of 2010, and local laws prohibiting corrupt payments to government officials, as well as import and export restrictions.

The factors noted above are not exhaustive. The Company and its subsidiaries operate in a dynamic business environment in which new risks emerge frequently. Accordingly, the Company cautions readers not to place undue reliance on any forward-looking statements, which speak only as of the dates on which they are made. The Company undertakes no obligation to update or revise any forward-looking statement to reflect events or circumstances arising after the date on which it is made, except as required by applicable law. Further information about the Company’s businesses, including information about factors that could materially affect its results of operations and financial condition, is contained in the Company’s filings with the SEC, including the “Risk Factors” section in the Company’s most recently filed Annual Report on Form 10-K.
