Comparison of Adjusted Information to U.S. GAAP Information

This presentation includes adjusted financial measures that are derived from the Company’s continuing operations. This non-GAAP information is provided in order to allow investors to make meaningful comparisons of the Company’s operating performance between periods and to view the Company’s business from the same perspective as Company management.

The Company’s earnings release dated April 28, 2015 contains exhibits that reconcile the differences between the non-GAAP measures and comparable financial measures calculated in accordance with U.S. GAAP.
“Safe Harbor” Statement Under the Private Securities Litigation Reform Act of 1995

This presentation contains “forward-looking statements,” as defined in the Private Securities Litigation Reform Act of 1995. These statements, which express management’s current views concerning future events, trends, contingencies or results, appear at various places throughout this report and use words like “anticipate,” “believe,” “continue,” “estimate,” “expect,” “forecast,” “future,” “intend,” “plan,” “potential,” “projects,” “strategy,” “target” and similar terms, and future or conditional tense verbs like “could,” “may,” “might,” “should,” “will” and “would.” For example, we may use forward-looking statements when addressing topics such as: the outcome of contingencies; future actions by regulatory, changes in our business strategies and methods of generating revenue, the development and performance of our services and products; the expected impact of acquisitions and dispositions; our effective tax rates; and our cost structure, dividend policy, cash flows or liquidity.

Forward-looking statements are subject to inherent risks and uncertainties. Factors that could cause actual results to differ materially from those expressed or implied in our forward-looking statements include, among other things:

- The rapidly evolving regulatory environment, in the United States and abroad, affecting Standard & Poor’s Ratings Services, Platts, S&P Global Indices, S&P Capital IQ and our other businesses, including new and amended regulations and our compliance therewith;
- the outcome of litigation, government and regulatory proceedings, investigations and inquiries;
- worldwide economic, financial, political and regulatory conditions;
- the health of debt and equity markets, including credit quality and spreads, the level of liquidity and future debt issuance;
- the level of interest rates and the strength of the credit and capital markets in the U.S. and abroad;
- the demand and market for credit ratings in and across the sectors and geographies where we operate;
- concerns in the marketplace affecting our credibility or otherwise affecting market perceptions of the integrity or utility of independent credit agency ratings;
- our ability to maintain adequate physical, technical and administrative safeguards to protect the security of confidential information and data, and the potential of a system or network disruption that results in regulatory penalties, remedial costs and/or improper disclosure of confidential information or data;
- the effect of competitive products and pricing;
- consolidation in our end customer market;
- the impact of cost-cutting pressures across the financial services industry;
- a decline in the demand for credit risk management tools by financial institutions;
- the level of success of new product development and global expansion;
- the level of merger and acquisition activity in the U.S. and abroad;
- the volatility of the energy marketplace;
- the health of the commodities markets;
- the impact of cost-cutting pressures and reduced trading in oil and other commodities markets;
- the level of our future cash flow;
- our ability to make acquisitions and dispositions and to integrate, and realize expected synergies, savings or benefits from, the businesses we acquire;
- the level of our capital investments;
- the level of restructuring charges we incur;
- the strength and performance of the domestic and international automotive markets;
- our ability to successfully recover should we experience a disaster or other business continuity problem, such as a hurricane, flood, earthquake, terrorist attack, pandemic, security breach, cyber attack, power loss, telecommunications failure or other natural or man-made disaster;
- changes in applicable tax or accounting requirements;
- the impact on our net income caused by fluctuations in foreign currency exchange rates and/or the repatriation of earnings; and
- our exposure to potential criminal sanctions or civil remedies if we fail to comply with foreign and U.S. laws and regulations that are applicable in the domestic and international jurisdictions in which we operate, including sanctions laws relating to countries such as Iran, Russia, Cuba, Sudan and Syria, and anti-corruption laws such as the U.S. Foreign Corrupt Practices Act and the U.K. Bribery Act of 2010, could lead to prohibitive payment to government officials, as well as import and export restrictions.

The factors above are not exhaustive. The Company and its subsidiaries operate in a dynamic business environment in which new risks may emerge frequently. Accordingly, we caution readers not to place undue reliance on the above forward-looking statements, which speak only as of the dates on which they are made. The Company undertakes no obligation to update or revise any forward-looking statement to reflect events or circumstances arising after the date on which it is made. Further information about our businesses, including information about factors that could materially affect our results of operations and financial conditions, is contained in the Company’s filings with the SEC, including Item 1A, Risk Factors, in our most recently filed Annual Report on Form 10-K.

* Shared operating services allocated to the segments
S&P Capital IQ: Revenue Mix

- Established S&P Credit Solutions to increase focus on Ratings IP
- S&P Capital IQ desktop is the most significant contributor to growth
- Headcount trends across customer base turning positive

Commodities & Commercial Markets: Financial Snapshot

Comparisons Impacted by the Sale of Aviation Week in August 2013 and the Reclassification of McGraw Hill Construction to Discontinued Operations

* Shared operating services allocated to the segments
Commodities & Commercial Markets

**PLATTS**
- Revenue generated from subscriptions and licensing for derivative trading
- Thousands of daily price assessments
- Oil, gas, petrochemicals, steel, agriculture, etc.

**J.D. POWER**
- Revenue generated from proprietary research, brand licensing, data and analytics
- J.D. Power expanding in Asia-Pacific which now represents approximately 30% of revenue

Platts Extending Price Discovery Capability Across Additional Commodities

**Platts Assesses Prices Across the Commodity Supply Chain**

- Commodity buyers / sellers use price assessments as a reference point to negotiate deals
- Market participants use established price assessments to enter into long-term contracts to ensure they can obtain supply and manage costs
- More established price assessments can achieve benchmark status over time
J.D. Power Acquires NADA Used Car Guide

• Premier source of used car value benchmarks including weekly auction, and monthly trade-in, loan and retail values
• Tuck-in acquisition fits well with the Power Information Network (PIN) business
• Subscription based business
• Expands JDP offerings in the U.S. Automotive OEM, retailers, financial services and insurance markets
• Anticipate both revenue and cost synergies
• Expected to be accretive within one year

PIN Delivers Data and Analytics

• Collection and analysis of daily new- and used-vehicle transaction data from thousands of automotive franchises
• Provides real-time automotive information and decision support systems that focus on what products are selling, at what price, who is buying, and how they are paying
• Helps customers to understand:
  - Market share and competitive analysis
  - Incentive spending and planning
  - Automotive finance lending
  - Vehicle aging
  - Buyer conquest and loyalty
  - Performance improvement measures
