Comparison of Adjusted Information to U.S. GAAP Information

This presentation includes adjusted financial measures that are derived from the Company’s continuing operations. This non-GAAP information is provided in order to allow investors to make meaningful comparisons of the Company’s operating performance between periods and to view the Company’s business from the same perspective as Company management.

The Company’s earnings release dated October 29, 2014 contains exhibits that reconcile the differences between the non-GAAP measures and comparable financial measures calculated in accordance with U.S. GAAP.
“Safe Harbor” Statement Under the Private Securities Litigation Reform Act of 1995

This presentation contains “forward-looking statements,” as defined in the Private Securities Litigation Reform Act of 1995. These statements, which express management’s current views concerning future events or results, use words like “anticipate,” “assume,” “believe,” “continue,” “estimate,” “expect,” “future,” “intend,” “plan,” “project” and similar terms, and future or conditional tense verbs like “could,” “may,” “might,” “should,” “will” and “would.” For example, we may use forward-looking statements when addressing topics such as: the outcome of contingencies; future actions by regulators; changes in our business strategies and methods of generating revenue; the development and performance of our services and products; the expected impact of acquisitions and dispositions; our effective tax rates; and our cost structure, dividend policy, cash flow and liquidity.

Forward-looking statements are subject to inherent risks and uncertainties. Factors that could cause actual results to differ materially from those expressed or implied in our forward-looking statements include, among other things:

- The regulatory environment affecting Standard & Poor’s Ratings Services, Platts, S&P Dow Jones Indices, S&P Capital IQ and our other businesses, including new and amended applicable regulations and our compliance therewith;
- The outcome of litigation, government and regulatory proceedings, investigations and inquiries;
- Worldwide economic, financial, political and regulatory conditions;
- The health of debt and equity markets, including credit quality and spreads, the level of liquidity and future debt issuances;
- The level of interest rates and the strength of the credit and capital markets in the U.S. and abroad;
- The demand and market for debt ratings in and across the sectors and geographies where we operate;
- The effect of competitive products and pricing;
- The level of success of new product development and global expansion;
- The level of merger and acquisition activity in the U.S. and abroad;
- The volatility of the energy marketplace;
- The health of the commodities markets;
- The strength and performance of the domestic and international automotive markets;
- The level of our future cash flows;
- Our ability to make acquisitions and dispositions and to integrate, and realize expected synergies, savings or benefits from, the businesses we acquire;
- Our ability to maintain adequate physical, technical and administrative safeguards to protect the security of confidential information and data, and the potential of a system or network disruption that results in regulatory penalties, remedial costs and/or improper disclosure of confidential information or data;
- The level of our capital investments;
- The level of restructuring changes we incur;
- Our ability to successfully recover should we experience a disaster or other business continuity problem, such as a hurricane, flood, earthquake, terrorist attack, pandemic, security breach, cyber attack, power loss, telecommunications failure or other natural or man-made disaster;
- Changes in applicable tax or accounting requirements;
- The impact on our net income caused by fluctuations in foreign currency exchange rates; and
- Our exposure to potential criminal sanctions or civil remedies if we fail to comply with foreign and U.S. laws and regulations that are applicable in the domestic and international jurisdictions in which we operate, including sanctions laws relating to countries such as Iran, Russia, Cuba, Sudan and Syria, anti-corruption laws such as the U.S. Foreign Corrupt Practices Act and the U.K. Bribery Act of 2010, local laws prohibiting corrupt payments to government officials, as well as import and export restrictions.

The factors above are not exhaustive. McGraw Hill Financial, Inc. and its subsidiary operate in a dynamic business environment in which new risks may emerge frequently. Accordingly, we caution readers not to place undue reliance on the above forward-looking statements, which speak only as of the dates on which they are made. The Company undertakes no obligation to update or revise any forward-looking statement to reflect events or circumstances arising after the date on which it is made. Further information about our businesses, including information about factors that could materially affect our results of operations and financial condition, is contained in the Company’s filings with the Securities and Exchange Commission, including the “Risk Factors” section in our most recently filed Annual Report on Form 10-K.

McGraw Hill Financial

- A great portfolio of increasingly interrelated iconic global brands
- Intensive focus on growth and performance
- Track record of delivering strong revenue growth and margin improvement
- 2014 guidance indicates excellent performance:
  - Mid to high single-digit top-line growth
  - Adjusted diluted EPS guidance of $3.78 – $3.83
- Strong balance sheet and cash flow enable continued investment while returning cash to shareowners
- Well-positioned to sustain growth

Comparisons impacted by the sale of Aviation Week in August 2013 and the reclassification of McGraw Hill Construction to discontinued operations in 2013 and 2014

* Shared operating services allocated to the segments

Commodities & Commercial (C&C) Markets

*Premier source of benchmarks, high-value information, data, and analytic services*

- Revenue generated from subscriptions and licensing for derivative trading
- Thousands of daily price assessments
- Oil, gas, petrochemicals, steel, agriculture, etc.

- **YTD 2014 comparisons driven by:**
  - Double-digit growth of both Platts and J.D. Power as well as the sale of Aviation week in August 2013

*Revenue generated from proprietary research and brand licensing*
- J.D. Power expanding rapidly in Asia-Pacific

McGraw Hill Financial
Platts Extends Price Discovery Across Additional Commodities

Platts Assesses Prices Across the Commodity Supply Chain

- Commodity buyers / sellers use price assessments as a reference point to negotiate deals
- Market participants use established price assessments to enter into long-term contracts to ensure they can obtain supply and manage costs
- More established price assessments can achieve benchmark status over time

Enhanced Balance Sheet Strength
